

Chapter Sixteen

Solar Energy Equipment Suppliers, Retailers, and Manufacturers

Renewable Energy Retailers (labeled "RE Retailer's" below) sell a wide range of solar and other renewable energy products and equipment directly to the public. Many also sell energy-efficient appliances and other sustainable living products. Many of these vendors will offer technical assistance and equipment recommendations over the telephone, and their web sites offer a wealth of information. If you do not use the internet, call to request a catalog. Retailers listed under "Solar Thermal" sell solar water, air, and/or pool heating equipment.
